BENEFITS

Sound Insulation

By installing Noise Cancellation Doors and Windows you can minimize noise pollution levels in your home by as much as a half.

Low Maintenance

Maintenance is simply a quick and easy clean and does not involve any further costs your home by as much as a half.

Wind Load

The ALECO windows and doors are stronger and has an extensive Performance lifespan as compared to other window materials.

Durable

ALECO material compound performs and exceeds worldwide standards for strength, durability, hout-stability, colour-retention, & termile- resistance

Water Tightness

Our windows and doors are made from innovative profiles to resist from Water, also come with no corrosion for lifetime feature.

Thermal Insulation

ALECO profiles comes with an uf value of 0.9 w/m2k up to 3w/m2k. Our patented design keeps you insulated from the outside emperatures, providing you the best available thermal performance possible today.

Air Permeability

During these days buildings are very high-rise with glass outer finish, to hold such heavy glass of doors and windows our product comes with extensive capability.

Weather Resistance

ALECO Profiles have been subjected to artificial weathering tests for more than 8000 hours and natural weath ering tests for 60 months.

Impact Resistance

ALECO frames, doors and windows are very light in weight but very strong in comparison to wood and plastic, it has greater absorb capacity against unusual impacts.

Termite Resistant

In many climates, timber windows and doors are often destroyed by termites, whereas ALECO windows and doors systems are fully resistant to these pests, thanks to our scientifically developed compound technology.

PRISMA Casement Door

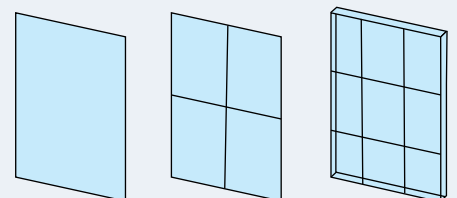

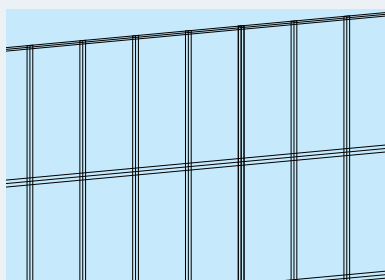

PRISMA casement doors can be designed with an inward or outward opening as required with a low or no threshold door base, which is both wheelchair and pushchair friendly. An aluminium French door configuration is the perfect option for larger openings or for modern Juliet balconies to upper floors. Pleated mesh can be added as well to these doors.

CURTAIN WALL

A **CURTAIN WALL** is defined as thin, usually aluminium framed wall, containing in-fills of glass, metal panels, or thin stones. The framing is attached to a building structure and does not carry the floor or roof loads of the building.
